

Diverse Cleaning

One call Cleans it all !

About Us

Diverse Cleaning Ltd formally Squeaky Clean has been established for over 30 years; our family-run business based in Cheshire. Our story began when Snr Castellano set to work with only a bucket of water and a squeegee in hand. Our aim is to offer each potential customer a tailored solution specific to each individuals or company's needs.

Window Cleaning

WFP Aka Water fed pole, allows windows to be cleaned from the safety of the ground using long reaching, telescopic poles. A soft bristled brush is used to scrub the dirt off the glass, while jets of pure water rinse the window. The pure water, as it has no impurities, dries to a spot-free finish leaving superbly clean glass behind.

Gutter Cleaning

The guttering and down pipes on your property are responsible for ensuring that water runs away from your property. Should they become blocked over time with debris, any water that floods over can enter your properties brickwork and foundations, potentially resulting in damp.

Roof Cleaning

We clean UPVC, roof beams, decorative finials, downpipes, and glass which can make your conservatory look like new again. Using our water fed poles and specialist cleaning products we are able to clean away green algae, mildew, dirt and any other staining that may be present.

A person wearing a blue surgical mask, a blue apron over a white shirt, and orange rubber gloves is holding a large blue bucket. The bucket is filled with various cleaning supplies, including several white plastic bottles of different sizes with blue and red caps, a green-handled brush, a blue-handled brush, and a stack of pink and purple cloths. The person is also holding a white rectangular object, possibly a piece of paper or a small sign, which has some yellow and green markings. The background is a blurred indoor setting with a window showing rain outside. The text "Thank You" is overlaid in a large, bold, black font across the center of the image.

Thank You
